

MCI™ Transport

PURIFY

air & surfaces

PROTECT

living spaces

PREVENT

spreading germs

Public Transportation

Ambulances

School Buses

The surface mounted MCI™ TRANSPORT is designed to improve indoor air quality by dealing with pollutants in a proactive way. The MCI™ TRANSPORT sanitizer produces aggressive ionized oxidizers and trademarked multi-cluster ions that are then distributed throughout the mobile environment.

This trademarked MCI™ Multi-cluster Ionization Technology, using an enhanced output, represents the newest generation of proactive air purification, is completely safe, unlike high levels of ozone, and effectively destroys mold, mildew, bacteria, viruses, odors, volatile organic compounds (VOCs) and the odors associated with them in the air and on surfaces.

- Trademarked MCI™ Technology
- Pro-active Air and Surface Sanitization
- Cleaner Air and Surfaces
- Cleaner, Safer, Healthier Environment
- Affordable, Durable
- Energy Efficient
- Patented DBI Components

NOTE: The internal components of unique MCI™ Technology has been tested and proven to reduce the microbial load in the air and on surfaces. Testing results have been compiled in a 550+ page booklet for your review, available up on request.
